Subject Index

Alloys
  coarsening kinetics of vanadium carbide in a high strength, low alloy steel, 179
  creep and constant-speed compression of a fine-grained Sn–Pb eutectic alloy, 23
  further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
  hardening mechanism in spinodal Cu–Ni–Cr alloys, 199
  microstructural damage and ductility of Cu–Co alloys under dynamic loading conditions, 91
  stress relaxation of a eutectic alloy in the superplastic condition, 33
Aluminium
  annealing effects in $Ni_{60}Nb_{40-x}Al_x$ metallic glasses, 207
  hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133
Annealing effects
  annealing effects in $Ni_{60}Nb_{40-x}Al_x$ metallic glasses, 207
Anodic polarization
  anodic polarization behaviour of $Ni_{60}Nb_{40}$ and $Ni_{55}Cr_6Nb_{40}$ glasses, 173

Bainite
  further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43

Cavity growth
  effect of matrix constraint on intergranular cavity growth mechanism maps, 113
Chromium
  anodic polarization behaviour of $Ni_{60}Nb_{40}$ and $Ni_{55}Cr_6Nb_{40}$ glasses, 173
  effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
  hardening mechanism in spinodal Cu–Ni–Cr alloys, 199
  tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Chromium oxide
  hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133
Coarsening kinetics
  coarsening kinetics of vanadium carbide in a high strength, low alloy steel, 179
Cobalt
  hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133
  microstructural damage and ductility of Cu–Co alloys under dynamic loading conditions, 91
Cold-rolled steel strip
  neutron diffraction study of the residual stress state of a cold-rolled steel strip, 1
  residual stress evaluation of a cold-rolled steel strip using X-rays and a layer removal technique, 13
Colour centres
  activation of colour centres in MgF_2 doped with LiF and NaF, 227
Compression
  creep and constant-speed compression of a fine-grained Sn–Pb eutectic alloy, 23
  dynamic recovery during compression testing of monocrystalline NaCl at elevated temperatures, 63
Copper
  dynamic recrystallization in Cu–P and Cu–Ge single crystals, 81
  hardening mechanism in spinodal Cu–Ni–Cr alloys, 199
Corrosion
  hot corrosion behaviour of nickel-based superalloy irradiated with a laser beam, 145
Crack
  role of point defects in fatigue crack initiation, 71
Crack growth
  crack growth in creep-brittle materials, L11
Crack-opening-stretch zone
  Comments on "Influence of specimen size on the crack-opening-stretch zone", 233
  reply to "Comments on 'Influence of specimen size on the crack-opening-stretch zone' ", 235
Creep
  creep and constant-speed compression of a fine-grained Sn–Pb eutectic alloy, 23
Creep-brittle materials
  crack growth in creep-brittle materials, L11
Czochralski-grown silicon
  structure of platelike oxygen precipitate in Czochralski-grown silicon, L9

Dual-phase structures
  tensile stress–strain analysis of dual-phase structures in an Mn–Cn–Si steel, L1
Ductility
  microstructural damage and ductility of Cu–Co alloys under dynamic loading conditions, 91

Elemental partitioning
  microstructural characterization and elemental partitioning in direct-aged superalloy (DA 718), 159
Evaporation
  properties of Zn_3P_2 films grown by close space evaporation, 193

© Elsevier Sequoia/Printed in The Netherlands

Fatigue crack initiation
on the role of point defects in fatigue crack initiation, 71
Ferrite
further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
Films
lattice expansion and contraction in sputtered metal films due to hydrogen charging, 127
properties of Zn_3P_2 films grown by close space evaporation, 193
Fracture topography
fracture topography of HSLA steels, 107

Germanium
dynamic recrystallization in Cu–P and Cu–Ge single crystals, 81
Glasses
annealing effects in $Ni_{60}Nb_{40-x}Al_x$ metallic glasses, 207
anodic polarization behaviour of $Ni_{60}Nb_{40}$ and $Ni_{55}Cr_6Nb_{40}$ glasses, 173

Hard coatings
hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133
Hardening mechanism
hardening mechanism in spinodal Cu–Ni–Cr alloys, 199
Hot corrosion
hot corrosion behaviour of nickel-based superalloy irradiated with a laser beam, 145
Hydrogen charging
lattice expansion and contraction in sputtered metal films due to hydrogen charging, 127

Kinetics
coarsening kinetics of vanadium carbide in a high strength, low alloy steel, 179

Laser
hot corrosion behaviour of nickel-based superalloy irradiated with a laser beam, 145
Lattice
lattice expansion and contraction in sputtered metal films due to hydrogen charging, 127
Layer removal technique
residual stress evaluation of a cold-rolled steel strip using X-rays and a layer removal technique, 13
Lead
creep and constant-speed compression of a fine-grained Sn–Pb eutectic alloy, 23
Lithium fluoride
activation of colour centres in MgF_2 doped with LiF and NaF, 227

Magnesium fluoride
activation of colour centres in MgF_2 doped with LiF and NaF, 227
Manganese
tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Martensite
further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
Matrix constraint
effect of matrix constraint on intergranular cavity growth mechanism maps, 113
Mechanical behaviour
further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
Microstructural characterization
microstructural characterization and elemental partitioning in direct-aged superalloy (DA 718), 159
Microstructural damage
microstructural damage and ductility of Cu–Co alloys under dynamic loading conditions, 91
Microstructure
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
Further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
Molybdenum
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
Multicomponent systems
evaluation of segregation profiles in multicomponent systems from the regular solution model, 217

Neutron diffraction
neutron diffraction study of the residual stress state of a cold-rolled steel strip, 1
Nickel
annealing effects in $Ni_{60}Nb_{40-x}Al_x$ metallic glasses, 207
anodic polarization behaviour of $Ni_{60}Nb_{40}$ and $Ni_{55}Cr_6Nb_{40}$ glasses, 173
hardening mechanism in spinodal Cu–Ni–Cr alloys, 199
hot corrosion behaviour of nickel-based superalloy irradiated with a laser beam, 145
Niobium
annealing effects in $Ni_{60}Nb_{40-x}Al_x$ metallic glasses, 207
anodic polarization behaviour of $Ni_{60}Nb_{40}$ and $Ni_{55}Cr_6Nb_{40}$ glasses, 173

Oxygen
structure of platelike oxygen precipitate in Czochralski-grown silicon, L9

Pearlite
further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
Phosphorus
dynamic recrystallization in Cu–P and Cu–Ge single crystals, 81
properties of Zn_3P_2 films grown by close space evaporation, 193
Platelike oxygen precipitate
structure of platelike oxygen precipitate in Czochralski-grown silicon, L9
Point defects
role of point defects in fatigue crack initiation, 71

Recrystallization
dynamic recrystallization in Cu–P and Cu–Ge single crystals, 81
Residual stress
neutron diffraction study of the residual stress state of a cold-rolled steel strip, 1
Residual stress
residual stress evaluation of a cold-rolled steel strip using X-rays and a layer removal technique, 13

Segregation profiles
evaluation of segregation profiles in multicomponent systems from the regular solution model, 217
Silicon
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
structure of platelike oxygen precipitate in Czochralski-grown silicon, L9
tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Sodium chloride
dynamic recovery during compression testing of monocrystalline NaCl at elevated temperatures, 63
Sodium fluoride
activation of colour centres in MgF_2 doped with LiF and NaF, 227
Solution model
evaluation of segregation profiles in multicomponent systems from the regular solution model, 217
Sputtered metal films
lattice expansion and contraction in sputtered metal films due to hydrogen charging, 127
Steels
coarsening kinetics of vanadium carbide in a high strength, low alloy steel, 179
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
fracture topography of HSLA steels, 107
further investigations on the microstructure and mechanical behaviour of granular bainite in a high strength, low alloy steel: comparison of ferrite–pearlite and ferrite–martensite microstructures, 43
hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133
neutron diffraction study of the residual stress state of a cold-rolled steel strip, 1
tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Strain
tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Strain rate
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5
Strain sensitivity coefficient
theory of the strain sensitivity coefficient of resistance, 153
Stress
neutron diffraction study of the residual stress state of a cold-rolled steel strip, 1
residual stress evaluation of a cold-rolled steel strip using X-rays and a layer removal technique, 13
tensile stress–strain analysis of dual-phase structures in an Mn–Cr–Si steel, L1
Stress relaxation
stress relaxation of a eutectic alloy in the superplastic condition, 33
Superalloy
hot corrosion behaviour of nickel-based superalloy irradiated with a laser beam, 145
microstructural characterization and elemental partitioning in direct-aged superalloy (DA 718), 159

Tin
creep and constant-speed compression of a fine-grained Sn–Pb eutectic alloy, 23
Tungsten carbide
hard coatings (Cr_2O_3, WC–Co) properties on aluminium or steel substrates, 133

Vanadium carbide
coarsening kinetics of vanadium carbide in a high strength, low alloy steel, 179

Work hardening
effect of strain rate and microstructure on the work hardening of a Cr–Mo–Si steel, L5

X-rays
residual stress evaluation of a cold-rolled steel strip using X-rays and a layer removal technique, 13

Zinc
properties of Zn_3P_2 films grown by close space evaporation, 193
